

Product Overview

Product Name: K-900 Series ISO 7241-A Poppet Coupling

High performance poppet coupling designed for demanding industrial hydraulic systems.

- Pressure Tested: 100% inspected before shipment
- Interchangeable: Fits Standard ISO 7241-A
- Buffer Stock: Consistent availability from Rajkot Facility

Engineering Features:

- ⚙️ **Standard Compatibility:** Fully interchangeable with global ISO 7241-A standards.
- ⚙️ **Durability:** Induction-hardened steel poppet for maximum cycle life and vibration resistance.
- ⚙️ **Versatility:** Modular design compatible with Carbon Steel, Brass, And Stainless-Steel body configurations.
- ⚙️ **Leak Protection:** Precision-machined seal interface prevents fluid loss during connection.

Technical Specifications:

Feature	Specifications
Series	K-300
Material Options	Carbon Steel, Brass, Stainless Steel (SS304, SS326), Titanium
Plating	Zinc-Nickel/ Trivalent Chrome (RoHS Compliant)
Max Working Pressure	Up to 320 Bar
Temperature Range	-20°C to +100°C
Seal Type	Nitrile, Viton (FKM), EPDM

Ordering Information:

For Bulk Pricing, custom material configurations, or technical support, contact our Rajkot facility.
Email: sales@shreekrishnaindustriesrajkot.com **Phone:** +91 98251 52457, +91 99248 44391
Address: Akshat Industrial Area, Plot No. 24, At Ravki, Ta. Lodhika, Rajkot-360004 (Gujarat) INDIA
